

KITCHEN'S BOARD

ADVANCED LEVEL

We practice our skills

Now you cook!!!

Once each player has a recipe, each player or team will have to move the robot on the board by running successfully and respecting the proper order of the actions to be accomplished.

Other possible activities:
You can propose players to make real thematic or ethnic menus.

UD9 Kitchen

In this unit, the robot will move around a kitchen. In the game mode we will perform many activities (ex. Counting, doubling, halving, measuring, etc.). In addition competences linked to life autonomy will be consolidated. The unit has three levels of increasing difficulty:

EASY LEVEL: you will have to recognize common kitchen utensils and equipment by moving the robot to the thematic table and associating each image with its name

MEDIUM LEVEL: you can use the provided table or create a personalized one. In this level the game will be to associate each utensil with its name and use. It will also be possible to insert the QR Code to provide further information

ADVANCE LEVEL team working should be appreciated. Two or more players are expected teams. Once the recipe is assigned, each player must move the robot on the thematic board by correctly performing the procedure and respecting the right order of actions

TO INTERACT WITH PHYSICAL ROBOTS
FOR INTELLECTUALLY HANDICAPPED PEOPLE

This unit the robot will move around a kitchen.

EASY LEVEL

Hello, this is our kitchen !!!

Do you know the names of these utensils?

Move the robot to the table (left, right, or north-south movements each box will be associated to each tool and its name.

You have skills board for help (table of main cooking tools)

MEDIUM LEVEL

Hi this is our kitchen !!!

What is "this"?

Move the robot to the table (left, right, or north-south movements each box must associate each tool with its name and the right use. You can enter QR Codes to provide insights and more information.

You have a bulletin board help (table of the main cooking tools and their use)
